

Michard Escale First Cow Classified EX-97 in France

In early February, *Michard* Escale was the first cow in the French classification history to obtain the global score EX 97. Classified by Didier Thareau, classifier at Prim'Holstein France, working in Côtes-d'Armor (Brittany), this cow in 6th lactation is owned by Gaec Michard (22). A score that many thought unreachable.

Currently there are 1472 cows still alive to have obtained an EX global score in France. A figure that increases from year to year.

To tell the truth, there are 1471 cows to be divided from the EX90 to EX96 score, and only one cow, *Michard* Escale (Damion x Jenus) belonging to Gaec Michard (22), has just been awarded February and for the first time in Prim'Holstein History, the outstanding score of EX97.

Michard Escale (*Damion x Jenus*)

72 261 liters produced in 5 completed lactations

Global Score	Mammary	Body	Dairy Strength	Legs and Feet
EX97	EX97	EX97	EX98	EX94
